

# SARAVANAN RAMESH

Full Stack Engineer | React.js • Next.js • Node.js • TypeScript • MySQL • MongoDB • AWS

Chennai, India • +91 90030 45246 • saravanan.r25032001@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

## PROFESSIONAL SUMMARY

Full Stack Engineer with 4+ years of experience building and deploying multi-tenant SaaS, LMS, CRM, ERP, marketplace, AI-integrated, and real-time applications using React.js, Next.js, Node.js, TypeScript, MySQL, MongoDB, and AWS. Delivered 10+ production applications across coaching, real estate, e-commerce/ERP, and exam-evaluation domains, improved API response times by up to 60%, and reduced manual processing effort by 90% through serverless automation. Experienced in REST API design, RBAC, subscription billing, real-time communication, LLM/RAG integration, background job processing, database optimization, and third-party payment and communications integrations.

## CORE SKILLS

**Frontend:** React.js, Next.js, Vue.js, Redux Toolkit, Zustand, Tailwind CSS, Ant Design

**Backend:** Node.js, Express.js, Laravel, REST APIs, WebSockets, Socket.IO, Background Jobs

**Languages & Data:** JavaScript (ES6+), TypeScript, PHP, MySQL, MongoDB, Mongoose, Schema Design, Query Optimization

**AWS & Architecture:** Lambda, S3, SQS, CloudFront, EC2, Serverless, Multi-Tenant SaaS, Event-Driven Processing

**AI / LLM:** OpenAI, Anthropic Claude SDK, Google Gemini, Qdrant Vector DB, RAG Pipelines, Local LLM Inference (llama.cpp), AssemblyAI

**Security:** JWT, OAuth 2.0, RS256, RBAC, Tenant Isolation, Rate Limiting, XSS and NoSQL Injection Prevention

**Integrations:** Stripe, Razorpay, Square, Firebase/FCM, Zoom SDK, Agora, Twilio, Google Calendar, Cloudinary, Swagger/OpenAPI

## PROFESSIONAL EXPERIENCE

**GNXTACE TECHNOLOGY** | Full Stack Developer | Chennai, India | May 2024 - Present

**NexusOne.coach — Multi-Tenant LMS and Live Coaching Platform** | React.js • Node.js • MySQL • Socket.IO • Stripe • Zoom SDK • OpenAI/Gemini/Claude

- Built an end-to-end coaching platform in React.js, Node.js, and MySQL covering courses, assessments, live classes, cohorts, and instructor payouts — five integrated workflows shipped to production.
- Secured tenant operations with RBAC authorization, session controls, and administrative activity logging across all protected actions.
- Automated the live-class lifecycle by integrating Zoom SDK, Google Calendar, Stripe, and Firebase Cloud Messaging across meetings, payments, and notifications.
- Built an AI-assisted learning layer — transcript-grounded Q&A and semantic search over a 150+ table MySQL schema — integrating OpenAI, Gemini, and Claude with a Qdrant vector store, plus an ffmpeg/play-dl ingestion and PDF-parsing pipeline across student, admin, and super-admin frontends.

**Seltrix — Multi-Tenant Website Builder and Template Marketplace** | Next.js • Node.js • MySQL • Stripe • Cloudinary

- Built multi-tenant website publishing with custom domains, template commerce, and public tenant rendering using dynamic Next.js pages, Node.js APIs, and Stripe workflows.
- Created a schema-driven template authoring pipeline with automated validation, preview, and import for the marketplace catalog.
- Built super-admin and tenant-admin panels for company setup, template assignment, and reporting with filtering, pagination, and role-scoped views.

**ZPONZ — Expert Marketplace, Wallet and CMS Platform** | React.js • Node.js • MySQL • Socket.IO • Stripe • AWS

- Built Stripe-backed wallet services supporting deposits, withdrawals, transfers, escrow balances, and scheduled payouts for experts.
- Expanded real-time engagement with Socket.IO and FCM notifications, plus an S3/CloudFront pipeline for cloud asset distribution.
- Enabled live consultations and rich media handling by integrating Agora and Twilio, an ffmpeg/Sharp/Jimp media pipeline, and an admin CMS for platform-wide content moderation.

**JNANA INVENTIVE PVT. LTD.** | Full Stack Developer | Chennai, India | June 2022 - May 2024

**AdUnity — Multi-Tenant CRM and AI Call Analytics Platform** | React.js • Node.js • SQL • Socket.IO • AssemblyAI

- Built a tenant-isolated real-estate CRM covering lead tracking, site visits, team analytics, and lead expiry across React.js interfaces, Node.js APIs, and SQL models.
- Automated call intelligence — click-to-call, transcription, sentiment analysis, and incoming-call alerts — by integrating Aloha, Knowlarity, AssemblyAI, and Socket.IO.

- Streamlined operational reporting with scheduled report generation, Excel/PDF exports, and FullCalendar-driven visit scheduling across role-based dashboards.

#### **QuickBizz — Multi-Tenant ERP/POS SaaS Platform** | *Laravel • Vue.js • MySQL • Stripe • Razorpay*

- Built a company-isolated ERP/POS platform covering billing, inventory, purchasing, warehouses, storefronts, and PDF invoicing — six production workflows on Laravel, Vue.js, and MySQL.
- Automated subscription governance across 15 functional modules with usage-based access and overdue-account restrictions using Stripe and Razorpay.
- Built point-of-sale operations with barcode scanning/generation, QR-based lookups, and PDF invoice generation via jsPDF and html2pdf.

### **FREELANCE EXPERIENCE**

---

#### **APPOLO SMART TEST** | Freelance Full Stack Developer | Concurrent with Full-Time Employment | Ongoing

##### **Enterprise Exam Evaluation Platform** | *React.js • Node.js • MongoDB • AWS Lambda • S3 • SQS • Firebase*

- Cut manual PDF-processing effort by 90% by designing a serverless pipeline on AWS Lambda, S3, and SQS.
- Stabilized high-volume push delivery for 1,000+ concurrent notifications without memory spikes using an FCM and SQS queue-worker architecture.
- Built 50+ production REST endpoints in Node.js with RS256 JWT authentication, validation, and structured logging.
- Delivered a 40+ route responsive React admin experience with reusable screens and optimized state management.
- Improved API response times by up to 60% through MongoDB indexes, lean queries, cursor-based pagination, and reusable Mongoose plugins.
- Enabled reliable large-file delivery — resumable uploads exceeding 500 MB — by implementing the TUS protocol with retry-safe handling and security controls.

### **ADDITIONAL PROJECTS**

---

#### **VoxIcons — AI Chat Assistant Platform** | *React.js • Node.js • Socket.IO • OpenAI • node-llama-cpp*

- Built a dual-mode AI chat assistant with real-time streaming conversations backed by both the OpenAI API and a self-hosted node-llama-cpp inference service, with Socket.IO messaging and a wallet-based usage/credit system.

#### **Ghana Visa — Visa Application and Payment Platform** | *React.js • Node.js • MySQL • AWS S3 • Stripe • Square*

- Built an end-to-end visa application workflow with document upload, staff review, and application-status logging, using AWS S3 document storage and dual payment gateways (Stripe and Square).

#### **Journal — Real-Time Blogging and CMS Platform** | *Next.js • Node.js • MySQL • Socket.IO • Swagger*

- Built a real-time content platform with live-updating blog feeds and a fully documented REST API, using a Next.js reader app, a Node.js/Knex backend, and Socket.IO-driven updates.

#### **Portfolio — Live System Design Showcase** | *Next.js • Express • SQLite • AWS EC2 • Nginx • PM2*

- Self-hosted and deployed at [saravanan.krelyvo.in](https://saravanan.krelyvo.in) on an AWS EC2 instance with Nginx reverse proxy, PM2 process management, and HTTPS via Let's Encrypt, with every architectural claim backed by a live, interactive backend API.

### **EDUCATION**

---

**Bachelor of Science in Electronics and Communication** | SRM Arts & Science College | 2018 - 2021 | CGPA: 7.8/10
